

Backflow Prevention Time Again

News Release Date
03-04-2024

The City of Whitesboro has partnered with SC Tracking Solutions at **(866) 232-0174**. This program is designed to prevent contaminants from entering water lines that go directly to your location and to the overall water distribution system. To ensure that your assembly remains in compliance with state and local regulations, please contact TCEQ licensed Backflow Prevention Assembly Tester (BPAT) to have the appropriate assemblies tested. For a list of TECQ licensed BPATs, contact SC Tracking Solutions <https://www.sctrackingsolutions.com/> and click Need a Service Provider.

Your technician will enter your catalog number online. You will be charged a fee by the technician and your results will be posted to SC Tracking and the City of Whitesboro.

Thank you for your cooperation in protecting our drinking water.

John White
